

Doctrine of Reformed Theology

1. Theology is different from religion for theology starts with God and moves to anthropology or the study of man.
2. Religion starts with anthropology or man and moves to God. The study of religion is the study of human behavior such as prayer, sacrifice, and ethics. Exodus 32 tells the tragic story of a man made religion.
3. Theology is the Queen of all sciences or studies. All other studies are subsumed in theology.
4. Theology is a theology which sets forth a belief system with God at the center.
 - *Genesis 1:1 In the beginning God created the Heaven and the earth.*
5. Reformed theology maintains that theology is life for it focuses attention on God and not upon felt needs and psychological comfort.
6. Luther said that he attacked the pope in his belly meaning he attacked the pope in his theology.
